

# PLACEMAKING

Recent calls to action for health increasingly emphasize the need for integrated strategies to reshape city streets and neighbourhoods for improved health, quality of life, and environmental outcomes.

## What is the issue?

Placemaking has the opportunity to be a key mechanism for health protection and promotion

## PLACEMAKING

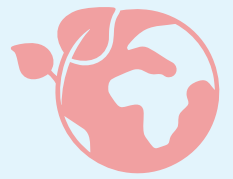

a collaborative and community-driven approach to urban planning and design, focuses on transforming public spaces to promote:

HEALTH

SOCIAL INTERACTION

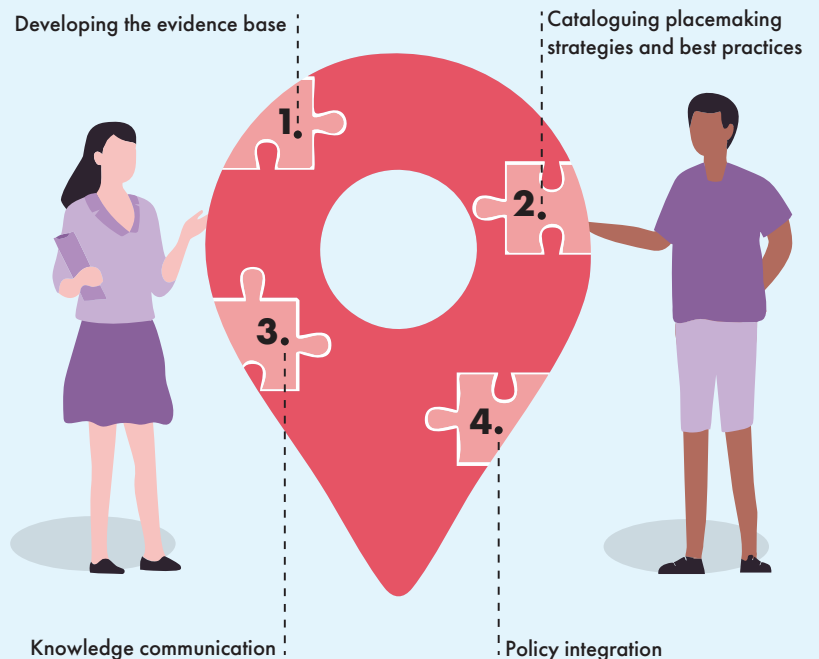

ENVIRONMENTAL SUSTAINABILITY

## Why is it important?

Various reasons why placemaking should be addressed:

## How can we help?

We are interested in collaborating. We can help you with:
